Experience

Software Engineer Sep 2024 – Present
Suiteify (formerly Infoniqa) *Rostock, Germany*

- Own two products end to end, **Infoniqa People** and **Suiteify Orbit**, across iOS, Android, and Web with **Expo**, **React Native**, and **TypeScript**
- Built **AI-powered expense calculation** for Suiteify Orbit, automating a manual, error-prone step for employees
- Drive an **agentic AI development** workflow with **Cursor** (Agent Mode) and **GitHub Copilot**, delegating scaffolding, multi-file refactors, test generation, and first-pass code review to AI agents grounded in project rules and codebase context
- Lead the Infoniqa People web platform's re-architecture into a **monorepo** with **micro-frontends**, and build **native modules** in **Kotlin** and **Swift**

Software Engineer May 2023 – Sep 2024
Deqode *Indore, India*

- Led development of **Furthr**, building its **Next.js** web app and **React Native** mobile app in parallel
- Implemented secure web and mobile authentication with **Firebase Authentication**, and shipped the web app to production on **Vercel** with continuous deployment
- Collaborated in an **Agile/Scrum** team across sprint planning, daily stand-ups, and retrospectives

Projects

Infoniqa People | *Expo, React Native, TypeScript, GraphQL, Kotlin, Swift* Sep 2024 – Present

- Employee self-service HR app for iOS, Android, and Web that lets employees track working time, check in/out, manage absences, complete license checks, and submit expenses
- Built NFC card-based check-in/check-out with custom Kotlin and Swift native modules, plus a home-screen widget to clock in/out without opening the app; data flows through a typed **GraphQL** client
- Re-architected the web app into a monorepo of micro-frontends so features ship independently, developing **AI-first** with Cursor and Copilot agents

Suiteify Orbit | *Expo, React Native, TypeScript, AI* 2026 – Present

- New expense and document management app for employees, built from the ground up
- Uses **AI to calculate expenses** automatically, reducing manual entry and errors in expense submission
- Includes a payroll **QR code scanner** and secure management of personal files and documents in one place

Furthr | *Next.js, React Native, TanStack Query, Tailwind CSS, Firebase, Vercel* Jun 2023 – Sep 2024

- Carbon-footprint platform that helps companies measure emissions from employees' daily activities and suggests personalized ways to reduce them
- Built the **Next.js** (App Router) web app and the **React Native** mobile app in parallel, reusing API integration and server-state patterns for feature parity
- Created emissions dashboards with **TanStack Query** caching, react-chartjs-2 visualizations, and responsive **Tailwind CSS** UI

Education

Acropolis Institute of Technology and Research (RGPV) Indore, India
Bachelor of Technology in Computer Science; CGPA: 8.39/10 *Jul 2019 – May 2023*

Technical Skills

Languages: TypeScript, JavaScript, Kotlin, Swift, Java, SQL, HTML, CSS
Frameworks: React Native, Expo, React.js, Next.js, Node.js, Express.js, NestJS
State Management: Redux Toolkit, Context API, TanStack Query (React Query)
UI & Styling: Tailwind CSS, shadcn/ui, Gluestack UI, Material UI (MUI), NativeBase
Backend, APIs & Cloud: GraphQL, REST APIs, AWS, Firebase, MongoDB, Vercel
AI & Agentic Tools: Cursor (Agent Mode), GitHub Copilot, Agentic AI Development, AI-Assisted Code Review, Prompt Engineering
Developer Tools & Testing: Git, GitHub, Docker, Jest, Enzyme, Agile/Scrum
